

Waste management register extract; Waste Act, section 98 §

Activity	Professional waste transport
Operator	CCI Transport GmbH & Co.KG
VAT number	DE814124879
Postal address	Carl-Benz-Straße 1, 69514 Laudenbach
Domicile	Germany
Country	Germany
Contact person	Sandra Heuchel
Contact person e-mail address	sandra.heuchel@cci-transport.de

Mutual recognition (EU/EEA countries)	
Registering authority	ELY Centre for Southeast Finland
Authority contact details	PO Box 1041, 45101 KOUVOLA, tel +358295029000, e-mail: jatehuoltorekisteri.kaakkois-suomi@ely-keskus.fi
Registration identifier	KASELY/832/2023
Registration date	31 May 2023
Deadline for extract verification	The waste management register extract must be verified by 31 December 2026. The ELY Centre for Southeast Finland sends the extract for verification.

Primary area of operation	Whole country
Waste included in the registration	
Waste code	Waste type description
06 03 13 *)	solid salts and solutions containing heavy metals
06 03 15 *)	metallic oxides containing heavy metals
06 04 05 *)	wastes containing other heavy metals
06 05 02 *)	sludges from on-site effluent treatment containing hazardous substances
09 01 06 *)	wastes containing silver from on-site treatment of photographic wastes
11 01 05 *)	pickling acids
11 01 06 *)	acids not otherwise specified
11 01 07 *)	pickling bases
11 01 09 *)	sludges and filter cakes containing hazardous substances
11 01 10	sludges and filter cakes other than those mentioned in 11 01 09

11 01 11 *)	aqueous rinsing liquids containing hazardous substances
11 01 98 *)	other wastes containing hazardous substances
12 01 04	non-ferrous metal dust and particles
12 01 14 *)	machining sludges containing hazardous substances
12 01 16 *)	waste blasting material containing hazardous substances
12 01 18 *)	metal sludge (grinding, honing and lapping sludge) containing oil
15 01 10 *)	packaging containing residues of or contaminated by hazardous substances
15 01 11 *)	metallic packaging containing a hazardous solid porous matrix (for example asbestos), including empty pressure containers
15 02 02 *)	absorbents, filter materials (including oil filters not otherwise specified), wiping cloths, protective clothing contaminated by hazardous substances
16 01 21 *)	hazardous components other than those mentioned in 16 01 07 to 16 01 11 and 16 01 13 and 16 01 14
16 02 15 *)	hazardous components removed from discarded equipment
16 06 05	other batteries and accumulators
16 08 02 *)	spent catalysts containing hazardous transition metals or hazardous transition metal compounds
19 02 05 *)	sludges from physico/chemical treatment containing hazardous substances
19 08 13 *)	sludges containing hazardous substances from other treatment of industrial waste water
19 12 11 *)	other wastes (including mixtures of materials) from mechanical treatment of waste containing hazardous substances

*) Hazardous waste, Commission Decision 2000/532/EC of 3 May 2000

Instructions for the activity:

Transported waste

The waste carrier is only allowed to transport the waste included in this extract in Finland.

Transporting waste for treatment

The waste carrier must ensure that the waste is transported to the location specified by the waste holder, and the waste transferee must have an environmental permit applicable to the waste to be received. If the waste is not accepted at its destination, the waste carrier must return the waste to the waste transferor, who must accept the returned waste.

The waste must be loaded and transported in a manner that poses no risk of littering or pollution to the environment. The transported waste must be in sealed packaging, or the used transport equipment must be enclosed. The used transport equipment may also be covered, or the waste can be transported in another manner if it can be ensured that the waste cannot enter the environment during loading or transport, and that the waste does not cause a risk of accident. Noise and other disturbances caused by the loading and transport must be reduced as much as possible.

If hazardous waste is transported, each waste type must be packaged appropriately and labelled in a manner that ensures safety and correct treatment. Different types of hazardous waste must be separated. The operator must ensure that the carrier of hazardous waste has all the required information on the transported hazardous waste types and their properties.

Waste containing asbestos must be delivered to treatment without delay and kept separate from other waste. Durable and sealable packaging must be used for transporting waste containing asbestos, and the packaging must bear labels indicating that the waste contains asbestos.

Firefighting equipment and absorbent material must be kept available on the transport vehicle in case of accidents. Any used absorbent material must be delivered to an appropriate treatment facility.

International waste transport

When waste is transported across Finland's borders, the waste holder must be familiar with the notifications and permits required for the international transport of waste.

Transfer document drafting and retention

The EU Regulation on shipments of waste provides for the movement document required for international waste shipments.

Before the waste is transported within Finland, the waste holder must draft a transfer document for hazardous waste, waste containing or contaminated by persistent organic pollutants within the meaning of Annex IV of Regulation (EU) 2019/1021, septic tank and cesspool sludge, sludge in sand and grease interceptors, contaminated soil, and construction and demolition waste other than uncontaminated soil that is shipped and delivered to the transferee. The transfer document must contain the information necessary for monitoring and supervision on the type, quality, quantity, origin, delivery site, delivery date, and the waste carrier of the waste.

The transfer document must be in electronic format. The transfer document must be accessible during the waste transfer, and the information on it must be accessible to all the parties associated with the transfer. The waste holder must confirm the information on the transfer document, that the waste carrier will transport the waste, and that the waste has been accepted by the waste transferee with an electronic signature, an electronic stamp or a similar reliable electronic authentication method. The waste holder and the waste transferee must retain the information on the transfer document for three years after the completion of the transport. The transfer document can be a paper document if it is impossible to draft it in electronic format.

The party drafting the transfer document must ensure that all transfer documents drafted are submitted to the SIIRTO register. Only transports within Finland are submitted to the SIIRTO register. The information must be submitted without undue delay. The information on a paper form must be submitted within three months of the completion of the transport.

Record keeping and reporting

If the activity includes the transport of waste in Finland, records must be kept on all the transported waste. The records must include the following information:

- the quantity of the waste
- the waste type and the waste type description
- whether the waste is hazardous waste
- whether the waste is POP waste
- for hazardous waste, its hazard characteristics, and for POP waste, the persistent organic pollutants found in the waste
- the name, company or community ID and contact details of the holder of the facility that supplies the waste or other waste holder
- the reception and supply date for the waste transport, and
- the name, company or community ID and contact details of the waste transferee

The records must be kept for six years, either on paper or electronically, to enable supervision of the activity. The records must be submitted to the authorities at their request.

A summary of all waste transported in the previous year must be submitted to the ELY Centre for Southeast Finland at its request.

Obligation to present a waste management register extract

A waste management register extract must be kept to hand during the transport of waste. The extract must be presented to the supervisory authority, the police and the waste transferor at their request.

Notifying changes to the activity

The ELY Centre for Southeast Finland must be notified without undue delay on the cessation of the activity or any changes to it, and a new application must be submitted when necessary.

Prohibition of storing waste

Entry in the register does not confer a right to store waste. Waste received for transport can be temporarily stored in the transport equipment.

The following Finnish provisions apply to these instructions:

Waste Act (646/2011):

section 13, section 14, section 16, section 17, section 29, section 31, section 72, section 73, section 94, section 95a, section 96, section 97, section 98, section 99, section 118, section 119, section 121, section 121a, section 121b, section 124, section 131, section 132, section 133, section 144

Government decree on waste (978/2021):

section 4, section 7, section 8, section 9, section 11, section 32, section 38, section 40, section 45a, section 47, section 51

A waste management register extract shall be carried during transport, and upon request, presented to supervisory authorities and the police. (Waste Act, section 98)

DECISION ON A FEE

Fee EUR 220 (VAT 0%)

The invoice for the fee is sent by the Finnish Government Shared Services Centre for Finance and HR.

Grounds

This decision on a fee is issued pursuant to the Act on Criteria for Charges Payable to the State (150/1992). The amount of the fee is determined in accordance with the Government Decree on the charges payable to the Centres for Economic Development, Transport and the Environment and the TE Services (1357/2022); according to the table on charges included in the Decree, a fee of EUR 220 is charged for producing a waste management register extract on a mutual recognition entry.

An administrative review can be requested concerning the fee. Instructions for requesting a review are appended.

Date 31 May 2023

Approval

This document has been approved electronically. This document was processed by Senior Officer Jukka Nevalainen. Approval of the document is indicated at the end of the document.

APPENDIX Request for an administrative review

REQUEST FOR AN ADMINISTRATIVE REVIEW OF A FEE

The authority to which the request is addressed

If the party subject to paying the fee deems an error has occurred in determining the fee, the party may request the **ELY Centre for Southeast Finland** to review the fee.

Deadline for the request

The request for an administrative review must be submitted to the ELY Centre of Southeast Finland within six (6) months of the date of the decision on the fee.

Content of the request

The request for an administrative review must include the following information:

- 1) the name, location and address of the party requesting the review
- 2) the original ELY Centre decision on the fee that is requested to be reviewed or a copy of it
- 3) the request for reviewing the fee
- 4) grounds for the request

The request must be signed by the party requesting the review or other party that drafted the review. If only the drafter signs the request, the request must also include the name, location and address of the requesting party.

Submitting the request

The request must be delivered to the ELY Centre registry office. At the sender's risk, the request can be sent by mail, courier or email. The request must be sent with sufficient time to ensure that it arrives at the registry office by the deadline and within office hours at the latest.

More detailed provisions for submitting a request for an administrative review by email are in the Act on Electronic Services and Communication in the Public Sector (13/2003).
